		Product information s	heet	
Supplier's name or trade mark:	W V	VÜRTH		
		nternational AG		
		ontstrasse 1		
Supplier's address (a):	CH-700	0 Chur		
Model identifier:	Art. 09	76 600 327		
Type of light source:	LED			
·/pg				
			Non-directional or	
Lighting technology used:		LED	directional:	Non-directional
Mains or non-mains:		Non-mains	Connected light source	
Colour-tuneable light source: High luminance light source:		No No	Envelope:	
Anti-glare shield:		No	Dimmable:	No
		Product parameters		
Parameter		Value	Parameter	Value
		General product parame	eters:	
Energy consumption in on-mode (kWh/1 000 h)		150	Energy efficiency class	E
			Correlated colour	
			temperature, rounded to the	
			nearest 100 K, or the range	
			of correlated colour	
Useful luminous flux (Quse), indicating if it refers			temperatures, rounded to the	
to the flux in a sphere (360°), in a wide cone (120°) or in a narrow cone (90°)		18000 lm wide cone (120°)	nearest 100 K, that can be	5000 Single value
(120) or in a narrow cone (90)		wide tolle (120)	expressed in W and	Single value
			rounded to the second	
On-mode power (Pon), expressed in W		150	decimal	0
			Colour rendering index,	
Networked standby power (Pnet) for C			rounded to the nearest	
expressed in W and rounded to the sec decimal	ond		integer, or the range of CRI- values that can be set	85 / 8086

displacement factor (cos φ1)				
	s a			
displacement tactor (cos φ1) Claims that an LED light source replace fluorescent light source without integrate			If yes then replacement claim	
Claims that an LED light source replace			(W)	
Claims that an LED light source replace fluorescent light source without integrate of a particular wattage.				
Claims that an LED light source replace fluorescent light source without integrate of a particular wattage.			(W)	
Claims that an LED light source replace fluorescent light source without integrat of a particular wattage. Flicker metric (Pst LM) (a) changes to these items shall not be con	ed ballast	evant for the purposes of point	(W) Stroboscopic effect metric (SVM)	2017/1369.
Claims that an LED light source replace fluorescent light source without integrat of a particular wattage. Flicker metric (Pst LM)	ed ballast	evant for the purposes of point	(W) Stroboscopic effect metric (SVM)	2017/1369.
Claims that an LED light source replace fluorescent light source without integral of a particular wattage. Flicker metric (Pst LM) (a) changes to these items shall not be con (b) if the product database automatically g	ed ballast		[W] Stroboscopic effect metric [SVM] 4 of Article 4 of Regulation (EU)	
Claims that an LED light source replace fluorescent light source without integrate of a particular wattage. Flicker metric (Pst LM) (a) (a) changes to these items shall not be con (b) if the product database automatically g (c)	ed ballast		[W] Stroboscopic effect metric [SVM] 4 of Article 4 of Regulation (EU)	
Claims that an LED light source replace fluorescent light source without integral of a particular wattage. Flicker metric (Pst LM) (a) changes to these items shall not be con (b) if the product database automatically g (c) :: not applicable;	ed ballast	e definitive content of this cell t	[W] Stroboscopic effect metric [(SVM) 4 of Article 4 of Regulation (EU) he supplier shall not enter these	
Claims that an LED light source replace fluorescent light source without integrate of a particular wattage. Flicker metric (Pst LM) (a) changes to these items shall not be con (b) if the product database automatically g	ed ballast	e definitive content of this cell t	[W] Stroboscopic effect metric [(SVM) 4 of Article 4 of Regulation (EU) he supplier shall not enter these	

not lower than the corresponding reference luminous flux in Table 4. The reference luminous flux shall be multiplied by the correction factor in Table 5. For LED light sources, it shall be in addition multiplied by the correction factor in Table 6;

for non-directional light sources, the claimed equivalent incandescent light source power (rounded to 1 W) shall be that corresponding in

Table 7 to the luminous flux of the light source.
The intermediate values of both the luminous flux and the claimed equivalent light source power (rounded to the nearest 1 W) shall be calculated by linear interpolation between the two adjacent values.

(d) '-': not applicable;

'yes': Claim that a LED light source replaces a fluorescent light source without integrated ballast of a particular wattage. This claim may be made only if:

the luminous intensity in any direction around the tube axis does not deviate by more than 25 % from the average luminous intensity around the tube; and

the luminous flux of the LED light source is not lower than the luminous flux of the fluorescent light source of the claimed wattage. The luminous flux of the fluorescent light source shall be obtained by multiplying the claimed wattage with the minimum luminous efficacy value corresponding to the fluorescent light source in Table 8; and

the wattage of the LED light source is not higher than the wattage of the fluorescent light source it is claimed to replace.

The technical documentation file shall provide the data to support such claims.
