LED			
sed:	LED	Non-directional or directional:	Directional
s:	Mains	Connected light source (CLS):	
	NO	Envelope:	NO
ource:	NO		
		Dimmable:	YES
		1	V 1
			Value
	7	Energy efficiency class	G
	450LM	Correlated colour temperature, rounded to the nearest 100 K, or the range of correlated colour temperatures, rounded to the nearest 100 K, that can be se	2700K
essed in W	6.5W	Standby power (Psb), expressed in W and rounded to the second decimal	
		Colour rendering index, rounded to the nearest integer, or the range of CRI- values that can be set	≥80
Height	53.5		1.0
Width	50	Spectral power distribution in the range	1.0
Depth	50	250 nm to 800 nm, at full-load	1.5 1.5 1.5 1.5 1.5 1.5 1.5 1.5 1.5 1.5
ver (c)	[yes]	If yes, equivalent power (W)	50
		Chromaticity coordinates (x and y)	0.463
B			0.42
	848	Beam angle in degrees, or the range of	38D
Param	eters for LFD and OLFD lia		
			≧0.9
	93.10%		
Paramete	rs for LED and OLED mains	light sources:	
os φ1)	>0.5	Colour consistency in McAdam ellipses	≤6
	[year-] (d)	If yes then replacement claim (W)	
M)	≤1	Stroboscopic effect metric	€0.4
enerates the definitive co e power of a replaced liburce type is listed in Ta	ontent of this cell the supplier shi ght source type may be given a	all not enter these data.  Sonly:  If the light source in a 90 ° cone (Ф90°) is i

Product information sheet

Supplier's name or trade mark: WURTH

Supplier's address (a):

Würth International AG Aspermontstrasse 1

CH-7000 Chur

for non-directional light sources, the claimed equivalent incandescent light source power (rounded to 1 W) shall be that corresponding in Table 7 to the luminous flux of the light source.

The intermediate values of both the luminous flux and the claimed equivalent light source power (rounded to the nearest 1 W) shall be calculated by linear interpolation between the two adjacent values.

(d) '-': not applicable;

be in addition multiplied by the correction factor in Table 6;

'yes': Claim that a LED light source replaces a fluorescent light source without integrated ballast of a particular wattage. This claim may be made only if:

the luminous intensity in any direction around the tube axis does not deviate by more than 25 % from the average luminous intensity around the tube; and

the luminous flux of the LED light source is not lower than the luminous flux of the fluorescent light source of the claimed wattage. The luminous flux of the fluorescent light source shall be obtained by multiplying the claimed wattage with the minimum luminous efficacy value corresponding to the fluorescent light source in Table 8; and

the wattage of the LED light source is not higher than the wattage of the fluorescent light source it is claimed to replace.

The technical documentation file shall provide the data to support such claims.
